

II. International symposium about electromagnetism

Oslo 16. -19. September 2010

Wireless Humanity

Radiation, health and consciousness

Special focus: Building biology; Dirty electricity; Neurophysiology; Therapeutic help with electrosensitivity

3 ½ days of lectures, debates and practice seminars
with researchers from 5 countries

Languages: Norwegian; English; German with translation

The Norwegian "Friends of the Earth" (Norges Miljøvernforbund) considers radiation the most important environmental issue in our time. The symposium is an effort to put this subject on the agenda and create greater insight and awareness through interdisciplinary dialogue.

With among others:

Mikko Ahonen (Researcher, Department of Computer Sciences, University of Tampere; Entrepreneur, Sustainable Mobile Ltd)

- Base stations and health risks – Research overview
- Power quality - Research and measurements in Finnish and Russian schools
(<http://beyondcreativity.blogs.com>, <http://www.sustainablemobile.com>, <http://www.chronicexposure.org>)

Dr. Vahan Babayan (Physicist -from Moscow University-, Waldorfteacher and professor at Haugesund University College; Haugesund/Norway)

- Field and energy: Phenomena and considerations
- Wireless electrical: Cutting edge technology - and new health challenge?

Jürgen Bayer (Building biologist, Psykokinesiologist, trainer in dr. Klinghardt-Neurobiology and MentalFieldTherapy; Kaisheim/Germany)

-Workshop: building biology, wellness and applied neurobiology /Psychokinesiologie

How to cope with geopathic stress? Holistic approaches to EMF and natural stress factors

<http://biokin.de>

(**Dr. Dietrich Klinghardt** (Physician, psychologist, pioneering researcher on the interconnections between EMfields, metal toxicity and chronic infections such as Lyme Borreliosis; Seattle /Washington, USA)

www.klinghardt.org, www.klinghardtneurobiology.com, www.selfhealth.co.uk, www.ink.ag

Because of "double booking", Dr Klinghardt will come at a later occasion but his research will be represented on the symposium by his close coworker Jürgen Bayer)

Andreas Bjørndal (Homeopath, Acupuncturist, Principal of the Norwegian Academy of Natural Medicine, contributor to "ReferenceWorks" & "Materia medica"/ MacRepertory; Oslo/Norway)

- Electromagnetism and health: an overview of symptoms
- Homeopathic diagnosis and treatment of electrosensitivity

www.nan.no

Dr. Florian Davidis (Physician and researcher; Basel/Switzerland)

-What makes radiation/frequencies harmful for health? Can pulsating magnetic fields have health effects?

- Health empowerment in the face of electromagnetic threats - Protection from in- or outside?

www.frauenarzt-davidis.de,

Anne Davidis (Bionenergetic therapist and breath therapist; Stuttgart/Germany)

- Workshop: Stabilizing the human organism against electromagnetic stress

Bionenergetics and Breath therapy have proven to be effective means in stabilizing the human organism under exposure to radiation / em-fields. Practical demonstrations.

Paul Gradenwitz (Vice president Eurmicros AS and Chip designer, a.o. for the earliest DECT telephones and for the newest *Acer* touchscreens; Nederland/Switzerland/Kina)

- How the wireless telephone was created
- Can technological innovations solve the health problems related to Wireless telecommunication?

Dr. Günter Haffelder (Physicist, psychologist, researcher, founder and director "Institute of Communications and Brain Research", Stuttgart/Germany)

- Consciousness and electromagnetism
 - Learning difficulties, ADHD, ME, Autism: Can they be linked to electromagnetic exposure?
- Workshop: Electromagnetism and child education

<http://www.gehirnforschung.com/englisch/medical.html>

Sissel Halmøy (Cand. Scient. Technical Cybernetics, Cofounder of association of electrosensitives "FELO" and of the newly started Citizens' Radiation Protection / "Folkets Strålevern"; chairperson of the International EMF Alliance (www.iemfa.org) Oslo/Norway)

- Understanding electromagnetism: An introduction
- Radiation in Norway

www.stralevern.no, www.iemfa.org

Ralph-Raphael Kleimann (Therapist - among others in toning and unity therapy, researcher and entrepreneur, BALDRON/Jordsamvirket, Vinterbro/Norway)

- Electromagnetic fields in therapy and natural environments.

www.baldron.com, www.emf-norge.no, www.freeearth.org

Ann-Marie Lidmark (Researcher in Biochemistry and Human health; Coordinator of HET project and consultant for the Swedish government; Stockholm/ Sweden)

- Dental health and electrosensitivity
- How do nutrient deficiencies, genetics and metal toxicity relate to electro-allergy
- Mapping of electrosensitivity in large scale health statistics: The HET project

<http://www.natureassociates.se>

<http://www.regeringen.se/sb/d/108/a/2642;jsessionid=aukk0JJnq9Ke>

Prof. Torgeir Lyngtveit (Professor for statistics, courses in building biology, University for Life Sciences in Ås; Drøbak/Norway) (*not confirmed*)

- Architecture and building biology

Dr. med. Joachim Mutter (Researcher for environmental medicine (formerly at University of Freiburg), bestselling author and pioneering critic of metal toxicity and vaccinations; Konstanz/Germany and Brasil) *-not confirmed*

-The amalgam connection: Metal toxicity and electrosensitivity

-Radiation free zones as therapeutic reserves for electrosensitive people

http://www.zahnklinik.de/umwelt_integrativ;

<http://www.alpenparlament.tv/playlist/april-2009-forst/107-behandlung-und-praevention-von-krankheiten-die-durch-toxische-wirkung-von-elektromagnetischen-felder-entstehen>

Dr. med Audun Myskja: (Physician, researcher, founder of Unity therapy, author and musician, awarded the Quality Prize of the Norwegian Medical Association; Oslo/Norway)

- Brain research, music and medicine of the future

- How to survive the digital everyday - simple exercises for body and soul

www.livshjelp.no

Dr. med. Kurt Mosetter (Physician, researcher in Psychotraumatology, founder of Myoreflex Therapy and clinical coach for tops athletes like Bayern München football team and German national hockey team. Konstanz and Cologne/Germany, Zürich/Switzerland and Italy)

- Physiological and biophysical molecular stress

- Workshop: Coping with molecular stress from electromagnetic fields

(together with his brother Rainer)

www.myoreflex.de, www.myoreflex.co.uk, www.movingmyo.com

Rainer Mosetter (Philosopher MA, researcher, educator, myoreflex-practioner and music therapist, Konstanz and Cologne/Germany)

- Workshop: Coping with molecular stress from electromagnetic fields

(together with his brother Kurt)

www.myoreflex.de, www.myoreflex.co.uk

Dr. med. Gerd Oberfeld (Adviser and speaker for environmental medicine, Austrian Medical Association and Public Health Department, Salzburg/Austria)

Dr. Oberfeld is known for his initiative for making Salzburg since 2000 a pioneering low-radiation city.

Limiting radiation levels based on clinical research

Dirty electricity: A new dimension of electromagnetic stress

Workshop: The healthy sleeping place: assessment and relief of stressfactors

<http://www.salzburg.gv.at/themen/gs/gesundheit/umweltmedizin.htm>

http://www.izgmf.de/Aktionen/Meldungen/Archiv_03/Salzbuerger_Modell/salzbuerger_modell.html

Heiko Wenner (Building biologist, consultation services for building using organic materials - surveys for electrosmog, harmful substances and geopathic pollution; Langen near Frankfurt/Germany)

-Building biology: Healthy sleeping places and work situations "holistic therapy"

-Negative interactions of electrosmog, metal toxicity and geopathic stress

<http://akury.com/baubiologie>

Professor Berit Ås (Social psychologist, 1. Deputy Chairman of SV party, and founder of the former Nordic women's university; Oslo/Norway)

- A historic perspective on electromagnetic and radioactive radiation in the community debate: about the synergy effect

Erling Veбенstad (environmental advisor and NLP Master Practitioner, many years of experience as engineer within radio- and telecommunication; Trondheim/Norway)

- EMF: a part of environmental certification?

- Body - soul methods to strengthen and protect ourselves

www.balansepluss.no

Program:

Thursday 16. 9. Wireless humanity - where are we today?

18:00-21:30 *Introduction and lectures with questions and discussions (with breaks).*

18:00 Welcome and introduction by Raphael Kleimann; presentation of keynote speakers

18:30 Lecture by: To understand electromagnetism: An introduction

19:30 Lecture by (dr. Gerd Oberfeld?) :

20:30 Lecture by Dr. Audun Myskja:

Friday 17. 9. Wireless...clueless? - Research on radiation and consciousness

11:00-16:30 Workshops: (Part 1; 11:00-13:00, break 13:00-14:00, Part 2; 14:00-16:00, Podium discussions 16:00-16:30)

The workgroups are based on the different language needs, at the same time they have a specific subject focus. It is possible to choose different workgroups from day to day. But in order to guarantee continuity, please stick to the workgroup you have chosen for one day.

Workgroups are process oriented and aiming at exchange of knowledge and experience: lecturers and participants can change the schedule according to their wishes.

The main subjects are:

- I. Norwegian speaking workgroup: Berit Ås, Sissel Halmøy, Erling Veбенstad ,Vahan Babayan*
- II. English speaking workgroup: Gerd Oberfeld, Paul Gradenwitz, Mikko Ahonen*
- III. German speaking workgroup: Günter Haffelder, Kurt & Rainer Mosetter*

16:00: Podium discussion on today's subject

18:00- 21:30 Lectures and discussions (with breaks)

18:00 Lecture by:

19:00 Lecture by:

Discussion

20:15 Lecture by:

Saturday 18. 9. Living within radiation - what can we do in practice?

11:00-16:30 Workshops: (Part 1; 11:00-13:00, break 13:00-14:00, Part 2; 14:00-16:00, Podium discussions 16:00-16:30)

The workgroups are based on the different language needs, at the same time they have a specific subject focus. It is possible to choose different workgroups from day to day. But in order to guarantee continuity, please stick to the workgroup you have chosen for one day.

Workgroups are process oriented and aiming at exchange of knowledge and experience: lecturers and participants can change the schedule according to their wishes.

The main subjects are:

- I. Norwegian speaking workgroup:
- II. English speaking workgroup
- III. German speaking workgroup:

16:00: Podium discussion on today's subject

18:00- 21:30 Lectures and Podium discussion (Lecture I: 18:00; Lecture II: 20:15)

18:00 Lecture by:

19:00 Lecture by:

Discussion

20:15 Lecture by:

Sunday 19. 9. Electromagnetism, health and consciousness: Future perspectives

10:00- 16:00 Lectures, discussions and summing up

10:00 Lecture by:

11:30 Lecture by: Dr. Audun Myskja

13:00 Lunch

14:00 Lecture by

15:30 Summing up and discussion

Entry fee:

Early Bird Special: Entire symposium: 2900 kr. (By payment before 1.8.2010)

Single days: 1200 kr. (By payment before 1.9.09)

Evening lectures (all lectures, per evening): 200 kr. (students and pensioners: Half price)

***The evening lectures can be visited independently of the Symposium**

- More information on the subject: www.biointiative.org, www.radiationresearch.org, www.buergerwelle.de

Organized by Earth Coop (Jordsamvirket) www.flowfond.org in connection with BALDRON Coop, network for research and therapy www.baldron.com

- Updated program and in-depth information: www.baldron.com and (starting in june): www.elsymposium.org
- Program of last year symposium: www.dvergakademiet.no
- Contact: post@baldron.com, Tel. +47 64943577

Registration:

See attached form. Send by email to post@baldron.com.

Registration is only valid when the fee has been fully paid to our account in Cultura Bank

You are invited to spread this invitation.

PS:

Information for electrosensitive people:

Throughout the symposium we try to guarantee the lowest possible radiation values. Every participant is asked to keep mobile phones completely shut off.

Thursday evening: the room in the "Litteraturhuset" has moderate EM values (average 10 NanoTesla and ca. 20 Microwatt/m²)

Friday through Sunday: The rooms in the ... school have very low levels of EMFields, no wireless networks are on.

More detailed information on the workshops:

Dr. Florian Davidis

- Can pulsating magnetic fields have health effects?

What makes radiation/frequencies harmful for health? Does it have to be that way?

In this lecture we will examine theoretical basis and practical experiences with electromagnetic fields in clinical applications. Dr. Florian Davidis speaks from a profound background as doctor and researcher in a.o. Aesculap Clinic, Switzerland and own clinic and health center in Stuttgart, Germany.

- Health empowerment in the face of electromagnetic threats - Protection from in- or outside?

The electromagnetic potential of the cell membrane can be irritated by EM pollution. The potential of a healthy cell (around 80 mV) can drop dramatically under such challenges. Besides shielding efforts to reduce the radiation sources a complementary strategy can build on activating cellular membrane potential, thus boosting immunity from inside out.

In this lecture we will examine theoretical basis and practical experiences with electromagnetic fields in clinical applications. Dr. Florian Davidis speaks from a profound background as doctor and researcher in a.o. Aesculap Clinic, Switzerland and own clinic and health center in Stuttgart, Germany.

- Health empowerment in the face of electromagnetic threats - Protection from in- or outside?

The electromagnetic potential of the cell membrane can be irritated by EM pollution. The potential of a healthy cell (around 80 mV) can drop dramatically under such challenges. Besides shielding efforts to reduce the radiation sources a complementary strategy

can build on activating cellular membrane potential, thus boosting immunity from inside out.

Anne Davidis (Bionenergetic therapist and breath therapist)

- Workshop: Stabilizing the human organism against electromagnetic stress

Bionenergetics and Breath therapy have proven to be effective means in stabilizing the human organism under exposure to radiation / em-fields. Practical demonstrations.

Heiko Wenner (Building biologist, consultation services for building using organic materials - surveys for electrosmog, harmful substances and geopathic pollution; Langen near Frankfurt/Germany)

-Building biology: Healthy sleeping places and work situations "holistic therapy"

-Negative interactions of electrosmog, metal toxicity and geopathic stress

- 1. Electrosmog

Without noticing it we are constantly exposed to electrical and magnetic fields and to electromagnetic waves.

Using technical equipment to measure the electrical charge of sleeping or work places according to organic building guidelines (high and low frequencies).

2. Ground radiation

Ground rays such as water veins, geological faults and global grids may be the cause of health problems. Practical advice on how to measure and how to obtain an interference-free sleeping place as a basis for vitality and well-being.

3. Pollutants

Pollutants in building materials and furnishings may act as the trigger for many illnesses. Laboratory – based methods of Pollution surveys and client-centered forms of measurement via kinesiology.

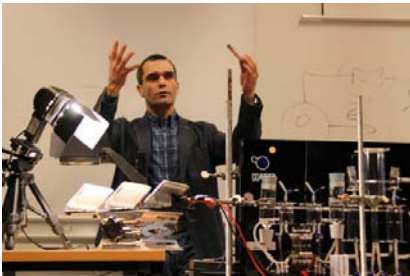

<http://akury.com/baubiologie/>

More detailed information on the lecturers:

Mikko Ahonen (Researcher, Department of Computer Sciences, University of Tampere; Entrepreneur, Sustainable Mobile Ltd)

Mikko Ahonen has earlier worked in telecom and IT industries (TeliaSonera Ltd etc.). Currently he is finalising his PhD in computer science and continues his research work at the University of Tampere. He co-operates with FinnMedi Ltd (Tampere, Finland) & Moscow State University + Kazan State University (Russia) & Gigahertz-Solutions GmbH (Langenzenn, Germany). He is also the founder and partner in the Sustainable Mobile Ltd, focusing on various measuring services and development of healthier technologies. .

Dr. Vahan Babayan (Physicist -from Moscow University-, Waldorfteacher and professor at Haugesund University College; Haugesund/Norway)

Dr. Florian Davidis (Physician and researcher, Switzerland)

www.frauenarzt-davidis.de,

Global Vice President of Agape

- Director "MED.EON Medical Institution", Germany
- Co-founder of "GGGM Genogyn-Genomed Institution", Germany
- Director "LIGEKO - Research Foundation for Collagen Metabolism and Anti-Aging", Germany
- Director "INF - Organisation", Germany
- Co-founder and Medical head of VITAVERSUM Research Institute, Germany
- Medical advisor/expert on German TV Health Programs

Paul Gradenwitz (Vice president Eurmicros AS and Chip designer, a.o. for the earliest DECT telephones and for the newest *Acer* touchscreens; Nederland/Switzerland/Kina)

Dr. Günter Haffelder (Physicist, psychologist, researcher, founder and director "Institute of Communications and Brain Research " Stuttgart/Germany)

Dr. Günter Haffelder is a physicist, psychologist and management trainer, but most of all known as founder and director of the "Institute of Communications and Brain Research " in Stuttgart. The institute works with freelancers who come from the fields of psychology, education, biology, medicine, physics and computer science and is part of a global network. Haffelders innovative research within medicine and pedagogics attracts more and more institutions, departments and clinics, a.o. in Austria, Switzerland, Russia (ministry of education), Ukraine and Poland. At the same time, Haffelder goes far beyond the restrictions of mainstream science by investigating the phenomena of consciousness, meditation and healing. He has also worked extensively on the interaction between consciousness and electromagnetism.

Ann-Marie Lidmark was born in 1953. She has a BA in biochemistry and zoophysiology from the University of Stockholm and a MA in public health science from the Mälardalens Högskola. Ann-Marie has worked as a teacher and editor and she has written several books on environmental and health issues. One of her main interests is in how human health is affected by heavy metals and toxins. She has in recent years carried out extensive work on the health effects of dental materials.

Special focus: Dental materials and health effects

Ann-Marie Lidmark has for many years done work related to the health effects of dental materials, in particular amalgam. During 2002 and 2003, the Social Ministry hired her to be head of the secretariat of the Dental Material Commission. She has also done work on behalf of the Swedish Association of Dental Mercury Patients.

She is currently leading the HET-project on how citizens with illness caused by dental materials and/or electromagnetic fields are treated. www.hetprojektet.info

Dr. med. Kurt Mosetter

Born on September 3, 1964, Kurt Mosetter studied medicine in Freiburg (Germany). After his *Staatsexamen* (German state issued license to practice medicine) in 1996 he made several journeys to the Far East in order to study the concepts of far eastern medicine (in particular in India, Tibet, Nepal).

He finished his academical studies in 1998 with his doctoral thesis at the *Institute for Psychology and Psychosomatic Medicine* (Professor Michael Wirsching) of the University of Freiburg.

After his studies he established his first medical practice. Here he marked the beginning of applied research that related the knowledge of modern science (physics, biomechanics, statics, neuroscience) to the traditional knowledge based on experience (acupuncture, dietetics). Over the next years Kurt Mosetter and his brother Reiner Mosetter created a new specific and very effective approach of therapy called **Myoreflex Therapy**. This genuine form of manual therapy has been beneficent for people suffering from **pain, stress** and **trauma** ever since.

In the course of the following years they established several medical practices and cooperative projects (in Germany: Constance, Cologne, Hamburg; in Switzerland: Zurich, Berlingen, Solothurn, Locarno).

Furthermore Kurt Mosetter is supervisor for more than 40 medical practices, working to the rule of the Myoreflextherapy. In addition to this function Kurt Mosetter supervises the education department for basic and advanced training in Myoreflex Therapy and personally teaches classes about his theoretical and practical concept in Germany and Switzerland.

On the basis of the dynamics of stress, trauma and accordingly **psychotraumatic stress** Kurt and Reiner Mosetter are closely connected to the *Institute for Psychology and Psychotraumatology* of the University of Cologne and

its founder, Prof. Dr. Gottfried Fischer, who is one of the important pioneers in this field. Dr. Mosetter is also closely connected to Professor Werner Reutter. Dr. Reutter is head of the *Institute for Biochemistry and Molecular Biology* of the Charité Clinic at the University of Berlin. In cooperation, Reutter and Mosetter are engaged in research about **physiological and biophysical molecular stress**.

Myoreflex Therapy has also proven to be a highly effective therapeutic measure for treating injuries in the field of **professional sports** such as soccer, hockey, tennis, and various others. Dr. Mosetter has been supporting several individual professional athletes as well as internationally renowned sports teams such as FC Bayern Muenchen (with head coach Juergen Klinsmann), TSG 1899 Hoffenheim, and the German national hockey team.

ZiT - Zentrum für interdisziplinäre Therapien

Obere Laube 44

Tel. 0049 (0)7531 915501

Fax. 0049 (0)7531 915067

info@mosetter.de

www.myoreflextherapie.de

Dr. Rainer Mosetter (Philosopher MA, researcher, educator, myoreflex-practitioner and music therapist, Konstanz and Cologne/Germany)

- Workshop: Coping with molecular stress from electromagnetic fields

(together with his brother Kurt)

Rainer Mosetter,

M.A. studied German literature and philosophy. He is a trainer and consultant in myoreflextherapy. Acclaimed as successful practitioners of the KiD method and music therapy, especially for children with so-called Attention deficit disorder

Websites: www.myoreflex.de www.myoreflex.co.uk

www.myoreflex.de, www.myoreflex.co.uk

Dr. Audun Myskja

Audun Myskja M.D., is a specialist in family medicine, palliative care and music in medicine (since 1981). He is a Fellow in music therapy, PhD project researcher integrating music in health service institutions at University of Bergen, certified Tomatis consultant and he is medical director at Senter for livshjelp (Life Aid Centre for integrated medicine; www.livshjelp.no). He has had a general practice, and leads workshops in medical self-care and integrative and energy medicine based on tools for healing and empowerment philosophy. Dr. Myskja has led and/or supervised ten national and international projects on music in medicine, published several research articles in refereed journals and is referee in several medical journals, including Norwegian Medical Directory. He has practiced in energy healing, polarity bodywork, toning (therapeutic voicework) and flower essences since 1976. He has led workshops in meditation, self-healing, sound therapy and energy medicine since 1988. Audun Myskja is an international lecturer on music in medicine and integrative care, has authored a dozen books on complementary therapies and several cds/dvds on relaxation and spirituality.

Dr. Myskja teaches unity therapy, a method for integration of the body and spirit through precise therapeutic work with energy fields, a teachable method for seeing/perceiving energy and uncovering the potential locked-in and stagnant energy

patterns through sound/resonance. Audun was awarded the Quality Prize of the Norwegian Medical Association 2002 for the development of research-based practical methods to improve care of vulnerable patient groups.

"The exciting interface between new research in music and the emerging practice of sound healing", looking specifically at:

- Research projects paving the way for integrative medicine
- Clinical examples of the effects of sound and music from thirty years of medical practice
- Music therapy methods of particular relevance for energy medicine
- Videos illustrating the rhythmic self-healing system in the body
- Voice therapy techniques, live with the audience

Gerd Oberfeld

Dr. Gerd Oberfeld was born 1960 in Klagenfurt, Austria.

Dr. Oberfeld holds a master degree for general medicine (MD) from the University of Vienna.

He is working with the Public Health Department of the Salzburg State Government since 1992 being responsible for environmental medicine tasks.

Since 1994 he is adviser and speaker for environmental medicine of the Austrian Medical Association being also responsible for the postgraduate course in Environmental Medicine.

Dr. Oberfeld has been scientific adviser of the Government of Southern Tyrol (Italy) for the implementation of the postgraduate course in Environmental Medicine 2005.

Main activities of the last years

- Project leader and Co-leader for epidemiological studies for asthma and allergies (e.g. ISAAC Salzburg 1995 & 1996)
- Project leader of the public health prevention project "Asthma Project for Children & Teenagers in Salzburg"

- Expert of the working group for the "WHO- Charter Traffic, Environment & Health" prepared for the Ministerial Conference on Environment & Health, London 1999
- Expert in the WHO project "Road Traffic Related Air pollution", prepared for the Ministerial Conference on Environment & Health, London 1999
- Organizer of the "International Conference for Cell Tower Siting - Linking Science & Public Health, Salzburg 7-8 June 2000"
- Exposure analyses and epidemiological investigations with respect to biological effects and health effects of electric, magnetic and electromagnetic fields (EMF)

Politics advice in matters of public health

Erling Vevenstad (environmental advisor and NLP Master Practitioner, many years of experience as engineer within radio- and telecommunication)

Heiko Wenner (Building biologist, consultation services for building using organic materials - surveys for electrosmog, harmful substances and geopathic pollution; Langen near Frankfurt/Germany)

Professor Berit Ås (social psychologist, 1. Deputy chairman of SV party, and founder of the former Nordic women's university)
